High surrogate recovery was observed for trifluorotoluene (FID) in the LCS for batch 97486. High surrogate recovery was observed for trifluorotoluene (FID) in the MS for batch 97486; the parent sample was not a project sample. High surrogate recovery was observed for bromofluorobenzene (FID) in the MS for batch 97486; the parent sample was not a project sample. High surrogate recovery was observed for bromofluorobenzene (FID) in the MSD for batch 97486; the corresponding trifluorotoluene (FID) surrogate recovery was within limits, and the parent sample was not a project sample. No other analytical problems were encountered.

TPH-Extractables by GC (EPA 8015B):
No analytical problems were encountered.

Volatile Organics by GC/MS (EPA 8260B):
High surrogate recoveries were observed for bromofluorobenzene in a number of samples; no target analytes were detected in these samples. No other analytical problems were encountered.

Pesticides (EPA 8081A):
High ICAL percent RSD (relative standard deviation) was observed for decachlorobiphenyl in the calibration analyzed 12/21/04 22:15; average ICAL %RSD met method requirements, and affected data was qualified with "b". No other analytical problems were encountered.

Thanks Steve!

I have another request and I hope it is easy for you to do. Could you separate the BB3GW100 and the BB3GW100RB100 samples into their own SDGs? The Trust is looking at this data apart from the GWM Project and would like this data to be validated separately.

Also, Blaine Tech is sampling 4 seep locations today and we would like to have these locations (BB3SW100 through BB3SW103) reported separately as well, for the same reasons as above.

I'm sorry for the inconvenience.

Please let me know if there is any problem.

Thanks!
Josh

Thanks Steve!

I have another request and I hope it is easy for you to do. Could you separate the BB3GW100 and the BB3GW100RB100 samples into their own SDGs? The Trust is looking at this data apart from the GWM Project and would like this data to be validated separately.

Also, Blaine Tech is sampling 4 seep locations today and we would like to have these locations (BB3SW100 through BB3SW103) reported separately as well, for the same reasons as above.

I'm sorry for the inconvenience.

Please let me know if there is any problem.

Thanks!
Josh

This hardcopy data package contains sample and QC results for four water samples, requested for the above referenced project on 12/17/04. The samples were received cold and intact.

TPH-Purgeables and/or BTXE by GC (EPA 8015B):
High surrogate recoveries were observed for bromofluorobenzene (FID) in a number of samples. High surrogate recovery was observed for trifluorotoluene (FID) in the LCS for batch 97615. High surrogate recovery was observed for trifluorotoluene (FID) in the MS of 1349MW102 (lab # 176726-004). High surrogate recovery was observed for trifluorotoluene (FID) in the MSD of 1349MW102 (lab # 176726-004). No other analytical problems were encountered.

TPH-Extractables by GC (EPA 8015B):
No analytical problems were encountered.

Volatile Organics by GC/MS (EPA 8260B):
Low response was observed for carbon disulfide in the ICV analyzed 12/07/04 19:49; this analyte was not detected at or above the RL in the associated samples. No other analytical problems were encountered.

Metals (EPA 6020) Water:
Responses exceeding the instrument's linear range were observed for magnesium and sodium in the MS/MSD of 1065PZ9B (lab # 176731-004). No other analytical problems were encountered.

Metals (EPA 6020) Filtrate:
Responses exceeding the instrument's linear range were observed for a number of analytes in the MS/MSD of 1349MW102 (lab # 176726-004) and the MS/MSD of BB3SW102 (lab # 176728-002). An amended package has been provided for the filtrate analysis. The incorrect sample containers were used for preparation to obtain the original reported results. No other analytical problems were encountered.

Ion Chromatography (EPA 300.0):
No analytical problems were encountered.

Alkalinity (EPA 310.1):
No analytical problems were encountered.

Total Dissolved Solids (TDS) (EPA 160.1):
No analytical problems were encountered.

Thanks Steve!

I have another request and I hope it is easy for you to do. Could you separate the BB3GW100 and the BB3GW100RB100 samples into their own SDGs? The Trust is looking at this data apart from the GWM Project and would like this data to be validated separately.

Also, Blaine Tech is sampling 4 seep locations today and we would like to have these locations (BB3SW100 through BB3SW103) reported separately as well, for the same reasons as above.

I'm sorry for the inconvenience.

Please let me know if there is any problem.

Thanks!
Josh
